Continuation of Disposition of Claims: Claims subject to restriction and/or election requirement are 1,2,6-10,13,15,16,18-24,26,27,29-34,36,38 and 41-46.

### DETAILED ACTION

This application is a Rule 371 continuation of PCT Serial Number PCT/US03/27306, which claims the benefit of the filing date of provisional U.S. Application 60/407,376.

Claims 3-5, 11, 12, 14, 17, 25, 28, 35, 37, 39, 40, 47 and 48 have been canceled.

Claims 1, 2, 6-10, 13, 15, 16, 18-24, 26, 27, 29-34, 36, 38, and 41-46 are currently pending.

#### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 6-10, 13, 15, 16, 18-24, 26, 29-34, 36, 38, and 41-46, drawn to a method for determining the amount of pyruvate dehydrogenase in a biological sample.

Group II, claim(s) 27, drawn to a kit comprising, as its sole essential component, an antibody to pyruvate dehydrogenase.

2. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Suhr (J Immunol. [1990]144(7):2647-2652; U on form PTO-892) teaches a group of monoclonal antibodies that bind to pyruvate dehydrogenase and distinguish it from protein X, another autoantigen in biliary cirrhosis (Abstract in particular). Accordingly, the antibodies of Suhr would be a valuable component of a kit distinguishing autoantibody reactivity in biliary cirrhosis and the groups are therefore not so linked by a special technical feature so as to constitute a single inventive concept.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point

Art Unit: 1644

out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
